

G SANIKA

BE – Computer Science and Engineering (Data Science)

Bellary, Karnataka — +91-9632651602 — gsanika50@gmail.com

PROFILE SUMMARY

BE student specializing in Computer Science and Engineering with Data Science, with an interest in programming, machine learning, and software development. Currently developing technical skills in Python, C, and data-oriented technologies through academic projects and hands-on learning.

EDUCATION

Bachelor of Engineering (BE)

Computer Science and Engineering – Data Science

Ballari Institute of Technology and Management

2025 – Present

CGPA: 9.25

Bellary, Karnataka

TECHNICAL SKILLS

Programming: Python, C

Core Skills: Problem Solving, Programming Fundamentals, Data Structures Basics

Interests: Data Science, Machine Learning, Software Development

Soft Skills Communication Skills

ACADEMIC PROJECTS

Fake Job and Internship Detection System

- Developing a machine-learning-based system to identify potentially fraudulent job and internship opportunities.
- Exploring data analysis and machine learning techniques for detecting suspicious job postings.

QR Code Generator Using Python

- Developed a Python-based QR code generator for UPI payment links.
- Used the `qrcode` library to generate and save QR codes as PNG files.

ADDITIONAL QUALIFICATIONS

- Basic computer knowledge
- Familiarity with programming using Python and C
- Hands-on experience with academic software projects

LANGUAGES

Kannada — Telugu — English — Hindi

KEY STRENGTHS

- Quick learner
- Problem-solving ability
- Willingness to learn new technologies
- Team collaboration
